

Polished Nickel Cabinet Hardware is Here!

Emtek's cabinet hardware is now available in one of today's most current finishes for interiors, polished nickel. This chic finish is widely used in kitchen and bath design, spanning styles from transitional to classic and contemporary. Homeowners and designers alike will now be able to match their Emtex cabinet hardware with the polished nickel finish of their faucets and fixtures, creating a cohesive design.

The collection of cabinet knobs and pulls is available for order today. Consult the [Addenda](#) for list price and product details.

Keep a lookout for an announcement on more cabinet hardware, door hardware and bath accessories later this year.

All literature, including this addendum, can also be found on the Emtex website under [Dealer Login](#).
