

Introducing: WHITE BRONZE

When antiquity meets modern innovation, it fosters new creation that celebrates both old and new.

Emtek is proud to introduce its newest product, White Bronze; a material with ancient roots that we have reimagined and reinvented to create a polished and refined new look.

Pieces available in White Bronze will include all sandcast bronze passage, privacy and dummy sets, most entry sets, and deadbolts. Look through Emtek's new Color Brochure and [White Bronze Addendum](#) for further detail on items available in the new material.

Compliment White Bronze door hardware with our new [Polished Nickel hinges](#).

All literature can also be found on the Emtek.com website under Dealer Login.
