

We Have a New Website!

California Faucets has redesigned its website with a streamlined new look and navigation menu that makes specifying decorative plumbing products fast and easy.

The newly enhanced site gives consumers extremely user-friendly tools to envision their ideal bath environment, while trade customers now have improved access to technical information and other helpful features that make specifying California Faucets simpler than ever. Moreover, visitors now gain a more valuable resource for our ground-breaking products such as [StyleTherm®](#), [StyleDrain®](#), and [CeraLine®](#). These proprietary products enable you to create the ultimate shower experience from the finest thermostatic technology to the finest decorative drains available today.

The new site was designed to inspire. The homepage displays rotating faucets, shower systems, luxury drains, and accessories designed to stimulate creative ideas for elegant and stylish bath designs. We've also vastly improved access to important specifications and installation instructions. Among many new features is the Dealer Portal, which gives authorized dealers special access via a user name and password. Once logged on, dealers benefit from useful information, including an online RGA submission form, cooperative advertising claim forms, and our terms and conditions.

Have fun exploring at www.californiafaucets.com.
