

Upcoming Changes

Changes to the model 19F/W

Mustee is making faucet holes and packaging changes to the 19F/W Utilatub Laundry Tub:

1. The hole configuration on the 19 laundry tub shelf from 2 to three holes. The 3rd hole is 1 1/8" in diameter and centered between the 4" center holes. The center hole does not affect the integrity of the shelf and is easily covered by any faucet base and 20.600 faucet block.
2. The 19FK and 19WK Utilatub Laundry Tub will no longer be a 6 pack. We are changing it to a 4 pack with a target date of 12-01-12. This will be a rolling change and the model number and UPC for the 19F/W will remain the same. However we will be assigning a new packaging code. The change to a 4 pack puts the carton weight under 75 lbs. This will make it easier for one person to handle. It will also reduce the problem of the nested tubs sticking or cracking. The new carton will be white to help visually recognize the change.

Change in drain on the 68, 30 and 70 Durastall Shower Stall

Mustee will be changing the shower floor drain in the 68, 30 and 70 Durastall Shower Stall from the 42.304A Drain assembly for solvent weld connection for 2" PVC to the 42.317A Drain Assembly with drain seal for connection to 2" PVC, ABS and Iron pipe.

New Catalog

There is a new Mustee catalog ADV-500 (rev.9-12), if you need new literature, please contact your Preferred Sales Inc outside sales person or inside sales team to receive a new version of the catalog.

New product 21F Utilatub Laundry Tub 18" wide

On page 24 of catalog ADV-500 (rev 9-12) is the 21F Lil'Tub Laundry Tub. This unit is 18" wide like the 12 Utilatub. The 21F is styled after the 28F and can accommodate multiple faucets. It uses the 18.300F leg which gives it a heavy duty look. They will not have a multi pack for now.

Please contact Wendy @ 724-704-7604 or wendy@preferredsales.com with any questions.
