

# MOSAIC SINK CARE

Mosaic is a very durable material for the bath, kitchen or bar.

Mild soap and water or mild household cleaners should be used to maintain the beauty of this product.

Ordinary grout cleaner will clean stained grout to its original color if needed.

Stone mosaic sinks have a 20 year sealer applied to help protect the sink.

We recommend a stone sealer be re-applied once or twice a year to keep the beauty of the product. Stone sealer can be purchased in small quantities at your local hardware store.

The grout is also sealed with a grout sealer that should be applied once or twice a year to maintain the sink.
