

NICKEL SINK CARE

Polished and Satin Nickel finishes are considered a "precious metal" and should be cared for as such.

Gentle soap and water should be used for day to day cleaning.

Never use any abrasives or harsh chemicals on the sink.

As nickel will darken over time, a mild silver cream will restore the nickel finish.

Each nickel sink is coated with a clear paste wax which will delay the darkening of the nickel.

The clear paste wax will wear away with cleaning and should be reapplied.
