

FEATURE IMPROVEMENT!

The hinges have been improved on six of our most popular SKU's. On the 24" & 30" freestanding models, CS-1310/11/60/61 and CS-1610/11/60/61 we upgraded to a "soft close" hinge with a 90° door stop option. Models CS-1400 & CS-1640 will also have the new hinges.

NEW SOFT-CLOSE HINGE
with optional
90° Door Stop

Top Hinge
←
Lower Hinge
→

The soft close hinge cushions the movement when the door is closed and ensures that the door closes very gently. The door and mechanism feels more substantial. As before, the doors are reversible. Model numbers did not change and new models are shipping now.

Remember, Liebherr has the only "cabinet depth" freestanding refrigerators in the industry - only 24" deep!

Perfect for new construction, replacement or remodeling in condominiums, apartments, galley kitchens, butler pantries & mother-in-law quarters - any place where cabinet depth refrigeration is the best solution!

If you have one of the old models on your floor, now is a good time to sell it and replace it with the upgraded models.
