MORTISE ENTRY SETS

UL LISTED

MORTISE ENTRY SETS

A UL Listed mortise lock-body is now available with Emtek door hardware. This lock-body offers the superior security of mortise function paired with the aesthetic beauty of Emtek entry sets. It also has a simplified, streamlined design without push-button passage controls. Homeowners can enter and exit the home without an accidental lockout.

This lock is well suited for multi-unit buildings such as condos and apartments. The ANSI F21 function includes an emergency egress, required by many building codes, which opens the deadbolt and latch when the interior knob or lever is turned.

UL Listed mortise products go through a rigorous testing process to ensure the design and craftsmanship are the absolute best. This lock-body meets the high safety standard with a UL 180 minute fire rating. Furthermore, its Grade 1 rating ensures the best security available.

HANDING

Determining handing for door hardware is different than determining handing for carpentry (ordering and hanging doors). If you follow the standard carpentry rules for handing door hardware, instead of following the diagram below, there is good chance you may end up with a lock that is handed incorrectly. Please refer to the diagram below and if you have any questions, call Customer Service at (800) 356-2741.

HANDING OF DOOR IS ALWAYS DETERMINED FROM THE OUTSIDE

In-Swing Doors

Out-Swing Doors
