Capital Ranges Model Transition

NEW MODEL INTRODUCTION

Late Dec./Jan. availability

Capital has now transferred all production of CGMR ranges to MCOR ranges, featuring the same larger oven capacity of the MCR series, of which we are already seeing positive sales trends. We still have inventory of the CGMR models, but will not be able to order any more from the factory, all further product for gas manual clean open burner ranges will have to be the new MCOR series. All of the new MCOR models will have the new improved 23k btu burners with the upgraded aluminum caps and the 8k btu **SMALL PANS** burner in the rear left corner.

Please be sure to check availability with an Inside Product Specialist, or by checking Almo Access. We expect to see limited availability of the new MCOR series in very late November or early December, with the transition complete in January 2014.

Precision & Culinarian Manual Clean Ranges - Mark II - Value Series Pro
