

LG Dealers,

We have just gotten spec sheets on an added version for LG front control washer that has been so very popular...

The WT1101 you already have is 27" wide and 4.3 cu ft

The new washer WT1001 is only 25" wide and therefore only 3.6 cu ft capacity – new washer MAP 599

The new dryer is virtually same as the dryer you are carrying and continues to be 27" wide (appears to be missing some chrome handle trim and work surface appears metal rather than plastic protected)
new MAP \$649

The cosmetics for these pieces are matching **SO** if a consumer wants to create a skinny pair at 52 inches total – you CAN use WT1001 with DLE1101 dryer to match.

I look forward to discussing the application of this new skinnier washer on the floors – and potentially adding it to your mix.

Thanks,
DH
