

Tumbled White Bronze

EMTEK®
ASSA ABLOY

Authentic Texture, Rustic Elegance

The art of sand casting is an ancient technique, used by master craftsmen, to create beautiful and ageless designs in bronze. Today, this time honored method has been combined with new innovation from Emtek to make a truly one-of-a-kind product, Tumbled White Bronze.

We've re-imagined sand casted White Bronze in a way that celebrates the authenticity of the material and brings out its natural texture. Tumbled White Bronze embraces the imperfections that organically occur during the casting process, making each piece of hardware unique. A hand applied wax coat creates a living finish, letting the hardware respond to the world around it and age beautifully. Every piece possesses its own individual look and character.

You can find Emtek's new Tumbled White Bronze in the [2014 Price Book](#) and browse through the full collection on our website.
