

## Product Clarification

**Please note: the F13 mortise lock box looks nearly identical to the F20 mortise lock box (with push buttons) UNTIL the faceplate has been installed.**

The single button located on the F13 lock does NOT depress or enable passage function. It will be covered by the faceplate when installed.

**F13 Mortise Lock Box WITHOUT faceplate installed**

**F13 Mortise Lock Box with faceplate installed**
