

# The Choice is Yours

Flush plates to enhance any bathroom design

# It's not just any bathroom, it's your bathroom.

The tiles reflect your style. The faucets and fittings strike the perfect balance between form and function. Now choose a flush plate that gives your bathroom the crowning touch. Geberit flush plates combine visual elegance with smooth operation, in a wide range of flawless finishes.

## Try out your own designs

The following pages include actual-size images of many of our flush plates. Fold back the left-hand side of the brochure, hold it against the wall, and let your imagination run wild!

# Your bathroom, your design.

Select the flush plate that appeals to you.

The best part is what you can't see

# Make it your own.

## Sigma Series flush plates

Geberit ensures unobtrusive yet reliable function, supreme convenience, and durability – all from behind the wall. The only visible element of the system is the stylish flush plate. Our Sigma Series offers the widest range of options available, so you can choose the flush plate that best suits you and your bathroom. Any time you decide to redecorate, switching plates only takes a few seconds: simply lift off the old plate and drop the new plate in its place.

Geberit systems let you design the perfect bathroom for your needs...now and in the future.

# Customizable Geberit Sigma70

## Select variety

### Geberit Sigma70 flush plate

Play with product materials and designs. With a completely smooth surface, Sigma70 opens up entirely new possibilities for custom plates.

# Touch-free flush

## Electronic hygiene

You're looking for hygiene and freshness without compromise. We offer you flush plates to meet your needs – touchlessly. Wave your hand or simply walk away. Improved hygiene should always be this easy.

Touch-free flush plates for toilets and urinals are available in matched designs.

# Geberit Sigma80

## A shining example

- Two color options
- Water-saving dual flush
- Touch-free flush
- Surface made of high-quality glass
- Low-energy LED lighting in five colors
- Sensor-controlled switch-on function
- Multiple award-winning design

Looking for a hands-free flush with manual override? See our Sigma10 in brushed stainless steel with IR operation (page 10).

black glass (SG)

reflective glass (SM)

### A color scheme to suit your mood

When you approach the toilet, two light bars in five selectable colors show you where to wave your hand for each flush.

# Perfectly positioned

## Omega Series flush plates

Geberit Omega is our short-height in-wall toilet system that gives you maximum design flexibility. Need to position the toilet under a window? Or maybe you'd like to build a pre-wall for handy storage and display. Geberit Omega is the perfect choice. Best of all, the matching Omega Series flush plates can be positioned for top- or front-flush, whichever you prefer.

# Geberit Omega20

## Well-rounded

**More convenience**  
Remote flush

**Touched a thousand times.**

The pneumatics of the Geberit Remote Flush Type 01 and Type 10 have been tested for years of stress. The technology is based on air pressure, not electrical current.

**A touch more refined.**

Thanks to the hydraulic servo lifter, a gentle touch is all it takes to activate the Geberit Remote Flush Type 70. No electrical current is required.

**Disappearing act**

Available in a variety of colors and materials, Geberit cover plates are designed to blend in. A tile-bearing version is available for a particularly invisible appearance.

In special construction situations, using a remote flush can be the optimal solution. Perhaps the bathroom layout calls for flush actuation at a different location to increase accessibility. Or maybe the user preference is for a flush control that's as small and elegant as possible. In cases like these, Geberit offers a variety of remote flush options with pneumatic force transmission. All can be placed anywhere within a 5.5 ft. radius of the concealed tank.

# Geberit Remote Flush Type 01

## Small actuator, great freedom

- Three color options
- Available in single flush or water-saving dual flush
- Can be placed anywhere within a 5.5 ft. radius of the tank
- For furniture as well as solid and drywall construction
- Pneumatic remote flush

# Seamless design

## Family style

Several Geberit flush plate families feature coordinated toilet and urinal plate designs. The result is a single design thread running through the whole bathroom. Flush plates for urinals that match the plates for toilets can be actuated by hand (pneumatic) or via touch-free technology (electronic, infrared detection).

# Geberit concealed tanks

The best part is what you can't see

In the best bathrooms around the world, flush technology is hidden behind the wall – a solution that is more hygienic, safer, and offers unbeatable stability. Geberit installation systems make it all possible.

Used in combination with the matching in-wall tank, Geberit Sigma flush plates cover a wide variety of design styles and user preferences. The Geberit Omega system with matching plates offers great flexibility, especially in pre-wall installations. Both flushing systems offer tool-free maintenance and guaranteed spare parts availability for 25 years.

Only Geberit offers the widest selection of both flush plates and reliable systems for installation of sanitary equipment behind the wall. And now that we've divided our plates and systems into two families with easy-to-remember names – Sigma and Omega – it's easier than ever to match the right flush plate with your preferred installation system.

- 1 The decorative actuator flush panel grants easy access to internal components. Resolve maintenance issues quickly and make simple change-outs with no tools. Choose front actuation (Sigma), front/top actuation (Omega), or remote flush.
- 2 Engineered for long life, the fill and flush valves utilize water-saving, dual-flush technology.
- 3 Tank integrity is guaranteed. The one-piece, integrated, gravity flush tank is individually leak tested for reliability and reinforced to prevent collapse. Plus, the insulation prevents condensation inside the wall.
- 4 Toilet bolts simply and securely to the Geberit mounting frame. Holds up to 880 lbs, exceeding ASME A112.6.2 strength requirements. WaterSense®-labeled combinations are available: see [geberit.us](http://geberit.us) for details.
- 5 You set the height. Adjustable-height carrier allows in-wall/pre-wall positioning of toilet seat height from 15" to 19". Accommodates either 2×4 or 2×6 stud construction.
