MAAX | COLLECTION - USA

Product Improvement

Please note that the below models will no longer come with Air jets located at the back of the tub, when ordering an Air Massage System. (previously 4-6 air jets were available). Going forward, Air jets will continue to be offered only at the bottom of the bathtub.

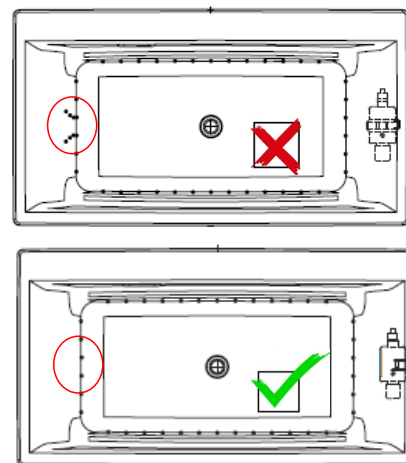

This modification will improve the overall customer appreciation of Air Systems, creating a more relaxing and pleasant bathing experience.

If you have displays of the below models, that are equipped with Air Systems, please advise your MAAX representatives. Required actions will be put in place to assure your displayed products reflect this change.

Effective change date: Immediately (September 23, 2016)

Impacted models
