

Kitchen Design Trends – Ventilation Hoods

November 2016

DA 6796W Shape and DA 6996W Pearl

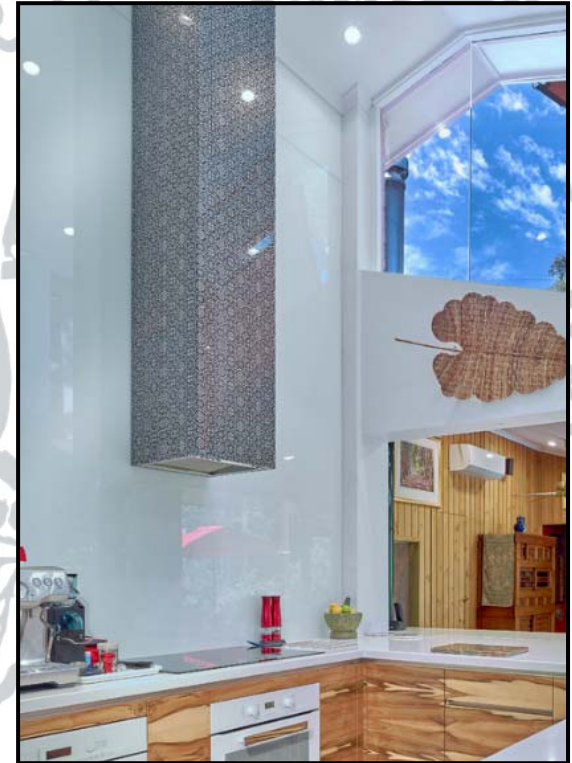

Introducing the new Miele DA 6796W and DA 6996W

➔ Two main reasons why both hoods are on trend – Modern Kitchen Designs and Open Layouts.

Modern Kitchen Designs

According to Pirch designers, modern kitchens are on the rise. Designers are bypassing the typical ventilation hood and opting for something new and different, such as an angled hood or a unique shape.

Open Layouts

As open concept homes are becoming the norm, designers are looking to non-traditional ventilation hoods to fit the theme. Ceiling extractors, wall hoods without chimneys, and sleeker, less obvious hoods are filling the need.
