

New LG ProBake convection™ Ranges - 5 Core Benefits

SALES TALK

1 ProBake convection™

Even Cooking, Baked to Perfection on Every Rack, Every Time

First freestanding range for the home to move the heating element from the bottom of the oven to the back wall for optimal heat distribution.

GAS

- ProBake Convection™ utilizes true gas convection and is more powerful than conventional convection. Cooking power! (From 800W to 5,570W=18,500BTU)*

*Note: Double Oven gas ranges use a 14.5k BTU gas convection system

ELECTRIC

- Dual fan speed convection system with a high power convection heater from 700W to 2500W
- From Low speed delicate baking to High speed crispy roasting

- 20% faster roasting* with Speed Roast
- No need to preheat

*Internal testing: cooking 1.5kg whole chicken: LG Conventional Convection 375°F Roast setting vs. ProBake Speed Roast
