## Collection

Dear valued customer,

We have launched the ModulR platform in August 2015, and the response has been very favorable since then. The market is recognizing the need for space saving solutions and an alternative to the standard shapes and dimensions currently offered.

The ModulR shower enclosure system offers right now the option of a pivot and a sliding door. However, the market feedback on the sliding door is that it takes too long to install, and that the adjustment range doesn't allow the product to deliver a smooth opening and closing action.

As a result, all ModulR sliding doors will no longer be available for purchase as of **September 1st**. Please note that the ModulR sliding doors for the Angular combo are no longer available for purchase **as of now** (you can refer to the TechnoMAAX for product information such as replacement product codes and list prices).

For all of your ModulR configuration needs, the sliding door should be replaced by the ModulR pivot alternative. For the Angular combo, since it has no pivot alternative, we have developed a Halo door derivative to fill the gap for this configuration. This new product is called Halo Angular and has all of the known benefits of the Halo doors, but fit for the configuration of the ModulR Angular combo only. It is also part of ModulR's product offering, and therefore is part of the Collection Series. **This Halo Angular is available immediately for order.**
