## V E N T I L A T I O N

Let your kitchen breathe. Four distinct ventilation options from the originators of downdraft technology.

## VENTILATION

For full ventilation offering including hood liners, see page 140.

### DOWNDRAFT

The innovation that started it all. Our downdraft ventilation system uses proximity ventilation to capture smoke, steam and odors at the cooking surface, whisking them down and out of the kitchen before they can escape.

### PROFESSIONAL-STYLE

With an exceptional 1,200 CFM blower, these luxury hoods are designed to work with high-heat, commercial-style cooking appliances. Powerfully clearing the air of smoke, steam and cooking odors.

### WALL MOUNT & ISLAND MOUNT

Wall installation allows the hood to seamlessly blend in with kitchens that follow a more traditional layout. Island-mount hoods expand installation options to accommodate ranges and cooktops in kitchen islands. If in-wall ducting is not possible or is undesirable, the exclusive JennAir® wall-mount recirculating-only hood is available and doesn't require a separate recirculating kit.

### LINER

This custom hood liner features a hidden ventilation system mounted to the inside of a custom vent cover (which can be made of metal, wood, plaster or tile), offering a uniquely streamlined look. It also offers you a choice of motors for different levels of ventilation power.

Warming lamps, inspired by restaurant kitchens, keep food warm until ready to serve.
