

NEW RDD-2 PRESSURE BALANCE VALVE SUPPORTING SHOWERHEAD/HANDSHOWER/TUB SPOUT CONFIGURATIONS

New pressure balance valve shower packages featuring showerhead/handshower/tub spout combinations are being added to the ROHL[®] and Perrin & Rowe[®] offerings due to the newly-designed RDD-2 diverter. The diverter is engineered exclusively for pressure balance valves and supports both showerhead/handshower and showerhead/tub spout functions.

KEY SELLING POINTS:

- Shower packages are now also offered for showerhead with handshowers, joining showerhead and tub spout packages for guest and secondary baths
- Trims are contemporary, maintaining streamlined styling with smaller foot prints
- The new diverter incorporates two distinct chambers which engages only one function at a time
- A rotary diverter was selected for smoother activation; small universal lever handles (soft square and taper cylindrical) replace push-pull knobs on valve trim
- Valve construction is brass and features a ceramic cartridge for durability
- IAPMO and CSA* listed
**Listing file numbers for each approval body are: IAPMO – 3366, CSA – 038573_C_000, ASSE - 1619*
- ADA compliant

PRICING:

- Trims — List pricing of trims are unchanged
- Rough — List pricing of the rough is unchanged
- An Excel pricing file is attached. The file contains a listing of all new trims, shower packages and the RDD-2 rough. The file will also contain a second tab of all discontinued model numbers. Please replace all discontinued SKUs in your system with the new SKUs. The third tab contains a replacement cross reference.

SHOWROOM DISPLAY(S):

- Your local House of Rohl Sales Rep will submit requests for replacing diverter handle trims in your showroom. Replacement parts are at no charge.

NEW RDD-2 PRESSURE BALANCE VALVE SUPPORTING SHOWERHEAD/HANDSHOWER/TUB SPOUT CONFIGURATIONS

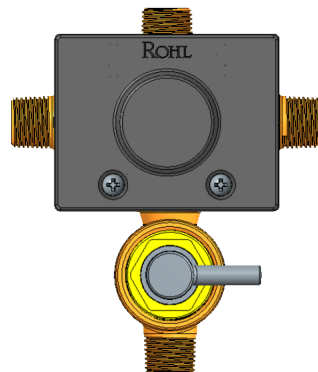

| ROUGH VALVE STYLE | | DIVERTER ACTUATOR STYLE | | SHOWER PACKAGES | |
|---|---|---|---|---|---|
|  |  |  |  |  |  |
| Previous style RCT-2 rough | Updated style RDD-2 rough | Previous diverter style | Updated soft square diverter | RDD-2 with tub filler | RDD-2 now compatible with handshowers |
|  |  |  |  | | |
| | | | Updated taper cylindrical diverter | | |

HOW THE RDD-2 WORKS

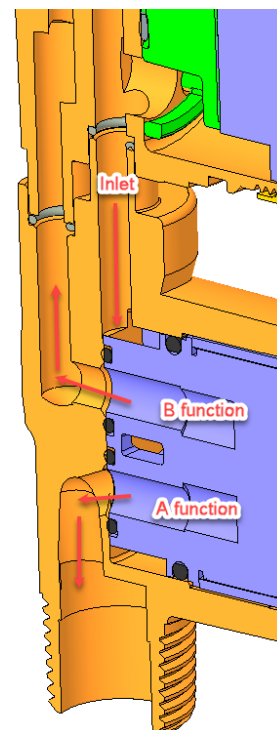

- Water enters from main control cartridge into diverter cartridge
- Diverter cartridge directs water flow based on handle position
- Ceramic discs channel flow into distinct chambers
 - Paths are separate
 - Flow is dedicated – it will not mix
- Flow paths illustrated in diagram

Showerhead

Handshower
or Tub Spout

Ceramic discs channel flow into separate chambers – paths are separate; flow will not mix
