Posi-Temp® with Integral Diverter

New platform stylishly combines a mixing valve and diverter.

Allowing for a streamlined appearance and easy installation, the Posi-Temp valve now provides options for either a three-function diverter (two shared/one discrete) or a two-discrete-function diverter, with or without stops. Available with 13 trims in a wide variety of styles, it will satisfy diverse customer needs across first upgrade, second upgrade and premium suites.

With less wall clutter and enhanced functionality, this Posi-Temp valve gives customers more ways to customize the shower.

AVAILABLE FINISHES*

-  Chrome
-  Brushed Nickel
-  Polished Nickel
-  Brushed Gold
-  Oil Rubbed Bronze
-  Matte Black

*Finishes aligned with current offering within each suite.

This Posi-Temp ADA-compliant platform is equally suited to tub/shower or showerhead/handshower configurations. It is an ideal solution for meeting ADA requirements when combined with either of our two new five-function handshowers that utilize 30-inch slide bars and a pause feature on the handshower.

Posi-Temp® Valves with Prefabricated Features

New valves with prefabricated PEX and cold expansion PEX shower outlets with or without a tub drop.

Eliminating the need to solder fittings on-site or prefabricate fittings in the shop, Moen's prefabricated valves offer important advantages including **faster and simpler installation**. All valve connections are tested for quality assurance.

Featuring:

- Single pack and bulk pack
- With or without stops
- 3-port valve (higher flow rate, ideal for showerhead + handshower applications)

Use Moen® Posi-Temp pressure-balancing cycling valves to increase productivity and profits.
