

*California Faucets*<sup>®</sup>

From our hands to your home<sup>™</sup>

November 15, 2019

Dear Select Dealers:

We are pleased to announce one of the most eagerly anticipated product launches in California Faucets history...**all brass multi-function handshowers!**

Now you can specify your shower product, including multi-function handshowers, in any of our 28 artisan finishes. Perfect match...every time!

Handcrafted from solid brass with an innovative weight-saving design to ensure comfort and safety, each handshower measures 4-1/8" in diameter, and features jet, massage and air functions. Designed to complement all traditional and contemporary collections as well as coordinating with our popular Descanso<sup>®</sup> industrial series and our new Steampunk Bay<sup>®</sup> series.

In addition, we are introducing a collection of **adjustable handshower brackets with locking swivel** to allow you to securely position the handshower angle for the most comfortable, personalized shower experience. No more "drooping" handshowers or rigidly static ones! Available, of course, in all our 28 artisan finishes.

Both new product launches are now in stock for order at current estimated lead times.

A special shout out to so many of you who have encouraged us over the years to bring the above two products to market. We thank you for your insights and enthusiasm and hope you like the new offerings as much as we do.

As always, our very best to you.

Kind Regards,

Jeff Silverstein  
President & CEO
