Ispira offers a choice of 8 trendy colored interchangeable glass panels to help you personalize your kitchen décor (purchase separately). The Ispira Island hood requires 2 glass panels - front and back. Models shown are with red panels.

BEST™ introduces their NEW Code Ready Technology (CRT), a feature offered in Ispira models and models with the iQ6 blower.

CRT provides the ability to set the maximum blower speed relative to any required Make-Up Air regulations, based on local codes.

The BEST™ iQ Blower System™ provides the quietest, best performing range hood design in the market.

The iQ Blower is up to 2X quieter than competitive blowers, 30% faster than the competition at removing smoke and odors, and up to 22X more energy efficient than competitor's high performance range hoods.
