# CITRINE™

60" L X 32" W X 21" D

Inspired by the light-giving optimism of the gemstone, the Citrine is a solid surface alcove tub associated with warmth and comfort. Natural citrine channels self-healing at its most elemental level, repelling any negative energy and transforming these problematic thoughts and feelings into positive ones. Complete with the integral seamless skirt and three-sided tile flange for easy install, the namesake benefits of this tub shine through in all it offers to the bather with its grounding presence, promoting self-healing on both a physical and spiritual level. Just like the yellow quartz Citrine, this bathtub has an inviting design along with distinct, durable edges that exemplify the stone's strength and support.
