To Our Valued Customer:

InSinkErator is pleased to announce the rollout of our new disposer packaging, increased product warranties and series designators. Beginning in mid-December, we will be migrating to new packaging for all InSinkErator branded product including the Badger, Contractor, and Pro Series. The new packaging will be more descriptive of the product in the box. Also, most models will have increased warranties as a result of our dependability and reliability and will be reflected on the new packaging. The rollout will be a rolling change and to help facilitate a smooth transition, ***all UPC's will remain the same and all products purchased after October 1 will have the updated warranties honored.***

Further communications to our contractor and showroom customers will note the new packaging and warranties that they will see from their wholesalers in the first quarter of 2020. This will help ensure that time is given to rotate your inventories. Please see matrix below for *NEW* warranty information along with the new look of the product packaging.

In addition to the new packaging and warranties, there will be larger labels added to the pallets to aid in product identification in your warehouse. Please refer to image below.

InSinkErator appreciates your continued support of our products. If you have any questions, please contact your Regional Sales Manager or local representative.

Thank you!
