

Perfect wine by the glass, **ON DEMAND**

Consumer Guide

FEATURES:

90 Day Preservation

- A motorized needle pierces the foil and closure, preserving your wine with argon gas for up to 90 days, perfect for the wine you want to savor over time.

Individually Chilled

- Two silent cooling chambers are automatically set to the perfect serving temperature for each varietal, so you can have white wine at 48° and red wine at 66°

Any Bottle, Any Closure

- Plum works with any standard 750 mL bottle of wine with any closure, including natural cork, engineered cork and even metal screw caps. Wax caps must be removed.

Fully Automated

- Plum automatically identifies the vintage, varietal, region, winery and wine, connecting to rich content that lets you step into the tasting room without leaving your home.

WHY PLUM?

Sometimes you just want a glass

- Enjoy a glass without pouring wine down the drain. Put any two bottles on tap and serve as much or as little as you want.

Be a better host

- Let guests serve themselves perfect temperature wine at the touch of a button. Combine multiple Plums to create a wine menu for guests to explore!

You deserve the “special” bottle

- We all have those bottles waiting for the special occasion that never comes. You can savor that treasured Bordeaux over a few weeks.

Temperature matters

- Wine tastes best at the right temperature. Plum maximizes the flavor of your wine by serving every glass at its varietal ideal temperature.
