3-Stage Grease Capture System

Phase 1: Baffle Filter Design

Designed for maximum air flow while reducing noise
Baffle filters, with smooth rounded edges, are dishwasher safe are for easy cleaning.

Phase 2: Inner Filter Shield

The inner shield is specially designed to distribute air flow evenly across the entire cooking surface while capturing any grease that may come through.

Phase 3: Removable Grease Channel

Removable grease channel located at the base of the filters is designed for maximum grease collection and easy cleaning.

Easy Touch Control Panel

Blower Controls:

A – Blower starts on 1st speed

B – 2nd speed

C – 3rd speed

D – 4th speed (Boost Function)*

After 7 minutes of operation in Boost Mode the blower will automatically move to 3rd speed.

Additional Controls:

E – Timer

Pressing button during operation will cause blower to run for 5 minutes at its current speed. Blower will automatically shut off.

F – Light On/Off plus Dimming Feature

Press once to turn light on and off. Hold in button to adjust light intensity. Selected intensity will stay in controller memory until changed.
