

BRUSHED BRONZE – A Double Take-Worthy Finish to Set the Scene

Gerber's Brushed Bronze finish exudes a warm golden tone that beautifully highlights our products' design, while the brushed surface gives a soft metallic glow, complementary to any style. Imagine Brushed Bronze as part of a stand-out space with bold colors and patterns, or paired with understated and soft neutrals so it really shines. Brushed Bronze is a versatile option that plays equally well with both traditional and modern spaces.

Brushed Bronze is a Permanence® finish and is produced using cutting-edge Physical Vapor Deposition ("PVD") technology. The PVD process molecularly bonds the finish to the product, creating the most durable and long-lasting type of finish available on the market. This type of finish makes products super resistant to corrosion, discoloration, tarnish and scratches. With Permanence®, our Brushed Bronze products will both perform and look like new for years to come.
