

# HYDROLUXE SS™ UNIVERSAL SHOWER PANS

Order a unique, custom shower pan ... the limit is your imagination!

Our Universal Shower Pans are made from a groundbreaking material called Hydroluxe SS™, which is a blend of natural minerals and the best in man-made composites. Due to the process it undergoes from liquid to solid, it can be molded into any shape and size, and results in a 100% solid, non porous surface that acts as a deterrent for bacteria, mold and mildew, is resistant to scratches and stains, and is highly durable. Since it acts as a waterproof barrier, there is no need to waterproof the subfloor before installation, saving you time and money.

## CUSTOM SIZE, SHAPE AND FINISH

Let us know the shape and size you need and we will custom make a shower pan to your specifications. Choose a custom color, finish (polished or matte), and a custom location for the drain. In addition to the standard round drain, a square drain will soon be available. Whether your project is large or small, our customization options will help you cut down on installment costs, as seen on the example to the right, where we shaped the shower pan around the wall (it was not cut out by the installer).

## IN-STOCK COLORS

Beyond these 13 in-stock colors, the ability to custom color-match means an unlimited palette that enables you to realize your wildest design dreams and express your unique personality. Get in touch to inquire about additional color options.
