

**CODE READY™ TECHNOLOGY on PF6**

**Training Presentation**

# CODE READY™ TECHNOLOGY (CRT) OVERVIEW

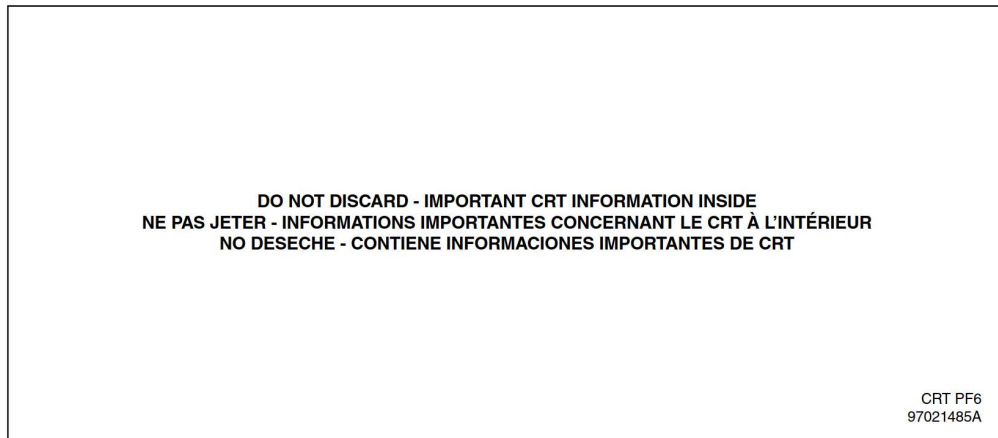

- CRT provides the ability to set the maximum blower speed relative to any required Make-Up Air regulations, based on local codes
- Offered in **BEST™ Ispira** models, models with the **iQ6** and **NOW** with models that the **PF6** blower is used with.
- This technology complements our broad offering of MUA damper options and our industry leading on-line tool that equips professionals with the right solution to codes and requirements

# CRT - PF6 (S97021485)

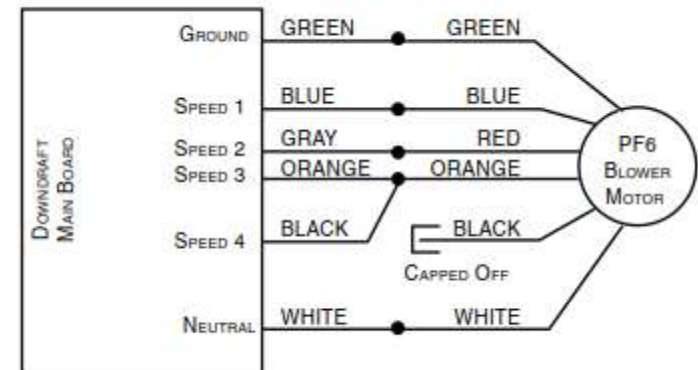

PF6 blower will contain a CRT Kit with instructions on how to limit discharge to **400 CFM only** on BEST™ hood sold with an internal modular option with PF6 blower such as D49M and DC54. To limit discharge to 300 CFM, please use in-line blower ILB3 if possible.
