New Product Introduction: Next Generation Dual Fuel & Induction Range

The Sub-Zero Group is pleased to introduce the Next Generation Wolf Dual Fuel and Induction Range anticipated availability Q1 2021.

A cross-reference table showing the discontinued current models and the new next generation equivalent models is on page 2. There is a price change on the Dual Fuel and Induction Ranges as part of this next generation launch. A new price sheet outlining the new models and supporting sales accessories will be provided in the near future.

As preparation for the launch begins, last time buy orders for the current models must be entered by **November 25, 2020**. Consider anticipated consumer needs for the current models and order accordingly. Product is not guaranteed and will be reviewed upon receipt of all orders.

The transition to the Next Generation Dual Fuel and Induction Ranges will begin as the current product stock is depleted.

*There is an important sizing difference to consider between the current and next generation 60" Dual Fuel models:

Current DF60 models = 60 1/8"W x 36 7/8"H x 29 1/2"D

Next Generation DF60650 models = 59 7/8"W x 36 1/2"H x 29 1/2"D

Pre-launch information including the new Design Guide with specifications for the next generation Dual Fuel and Induction Ranges can be found now on the Future Product page within the Trade Resources menu at subzero-wolf.com.
