

BULLETIN: 192 New Marvel Professional Products

DATE: October 29, 2020

NEW PRODUCT ANNOUNCEMENT:

Phase 1 Launch of the Marvel Professional Collection

This winter we welcome the phase one launch of the new Marvel Professional Collection with more customization options than before. With this communication, we also provided the product spec sheets and updated Marvel price book. The new Marvel Professional brochure will be available prior to the December launch.

Marvel Professional dual zone products will follow early next year in the phase two launch. Professional clear ice models will remain through late 2021.

KEY DATES:

- **Inventory Availability:** New models will begin shipping from Middleby Residential distribution centers in early December 2020.
- **Live on Website:** The product pages will go live on the Marvel website December 1 with links to the spec sheets, brochure, owner's guide, energy guides and other product documents.

KEY DIFFERENCES:

- **More Finish Options:** Most Marvel Professional models will now be available with four door style options: stainless steel glass frame door, solid stainless steel door, panel-ready glass frame door and solid panel-ready door. Exception: refrigerated drawers and freezer models.
- **Reversible Soft-Close Door:** Additionally, the reversible door design provides easy, adaptable installation with right or left swing options on each model—and the ability to change the door swing later in the field.
- **Eco-Friendly Components:** We incorporated climate-friendly, energy-efficient, non-HFC foam insulation and R600A refrigerants in the new line-up. These new components have “zero” Ozone Depletion Potential, (ODP), and “very low” Global Warming Potential, (GWP). In addition, the improved energy efficiency realized significantly reduces operating cost.
- **Expanded Temperature Range:** Program even greater temperature flexibility with the new Marvel controls. Select between 33°F to 70° F (-10° F to 10° F on the freezer model).
- **New Control Location:** The Marvel digital control display is now located inside the unit on the top of the internal cabinet rather than the top of the door.
- **New Model Number Nomenclature:** You'll see our new nomenclature system with this rollout (see next page for guide to understanding the new model numbers).

ORDER TODAY: Contact your Middleby Residential rep for details.
Please reference ordering details on the following pages.

NEW MARVEL PROFESSIONAL NOMENCLATURE SYSTEM

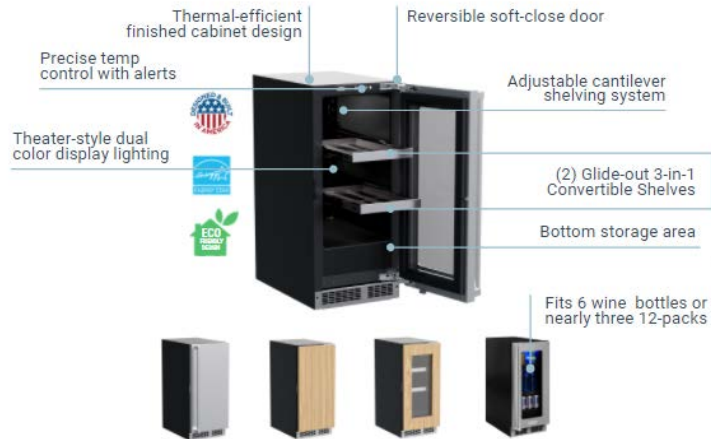

MPBV424-SG31A

BRAND CODE	PRODUCT CATEGORY	PRODUCT TYPE	FEATURE LEVEL	OVERALL WIDTH (INCHES)	FINISH	DOOR / DRAWER	HINGE/LOCK	VOLTAGE	REVISION LEVEL
