PRODUCT PRIORITIES 2021 NEXT GENERATION E-SERIES LAUNCH

The product priorities have been established to drive consistency in the field, adherence to visual standards, and the best brand representation of the product line.

The only requirement for the Next Generation E-Series products is to ensure dealers have at least one single and one double oven represented on their floor, following the standards below.

PRIORITIES OVERVIEW

- 1 Priorities are set for different install applications.
- 2 You can choose between option 1 or 2, but should place both before choosing something else.
- 3 Once all priorities have been met, teams have flexibility to showcase other product offerings

MILLWORK ADJUSTMENTS

*NEW millwork will be required for ALL installs, as the new E-Series sizing will now match the M-Series sizing.
