

Professional-grade dishwashing performance with short cycle times. Now for your home!

Miele's ProfiLine dishwashers are built for homes with the highest demands for cleanliness and design. Breakfast, lunch and dinner, special events and family parties – this exceptional dishwasher is ready to perform up to 5 cycles per day. Featuring short cycle times as little as 58 minutes, the PG 8130i is custom panel ready and can accommodate 13 place settings with routinely spotless results. The flexible basket design and special programs guarantee the perfect gentle care of dishes and glassware.

Very short cycles

ProfiLine dishwashers are the perfect choice for short cycle times and sparkling results. Intelligent dishwashing technology and a powerful heater pump ensure the shortest possible cycle times, starting at only 58 minutes. Take advantage of innovative features that make your dishes sparkle day after day in the shortest amount of time. With delay start you can determine up to 24 hours in advance when the selected program should start. After the program has started, the display will indicate the current time remaining for the cycle.

Recirculation turbothermic drying

The recirculation turbothermic drying allows more effective drying through separate air circuits - a condensate cycle and a cooling circuit using ambient room air. At the end of the cycle, the hot, moisture-laden air from the wash cabinet is drawn into a condenser. The condensed moisture drains into the sump, and dehumidified air re-enters the wash cabinet.

Low sound emissions

The ProfiLine dishwashers generate low sound pressure of 38 dB(A) and are particularly quiet, while producing consistently excellent results.

Low Consumption

The environmentally friendly way of cutting costs: ProfiLine dishwashers feature low energy consumption and are known for maximum efficiency. Miele products are engineered to achieve perfect dishwashing results by using recyclable materials and reducing water, energy and detergent use.

Maximum flexibility

Thanks to an extremely flexible basket design, glasses, dishes and cutlery are perfectly cleaned. FlexAssist color coding indicates at a glance which elements allow baskets to adapt to individual needs. FlexCare glass holders accommodate wine glasses securely in the basket. This guarantees perfect and gentle cleaning.
