T6BCC	Bottom Connection Cap for side connection conversion (pair)	\$16

- Type 21 radiators are built with 2 panels and 1 convactor bank – with a total thickness of 80 mm (nominal 3-1/8").
- Type 22 radiators are built with 2 panels and 2 convactor banks – with a total thickness of 105 mm (nominal 4-1/8").
- Standard wall brackets are included with the purchase based on radiator height, either KOM-300, KOM-400, KOM-500 or KOM-600 (*all KOM brackets a.k.a. "L-brackets"*). EZ-brackets (*a.k.a. Sigarth Brackets*) are available as an option and purchased separately. KOM brackets/L-brackets fix to the wall and attach to the lugs on the back of the radiator. EZ-brackets/Sigarth Brackets fix to the wall and attach to the top and bottom of the back panel, providing a little more flexibility when installing on traditional stud walls.
- T6 Radiators come with factory installed thermostatic valve, manual adjustment knob, air vent and plug.
- Thermostatic valve actuator heads are available and sold separately (*see below for details*).
- Bottom connection ports are covered with temporary plastic plugs. If these ports are not used for supply and return, the temporary plastic plugs must be removed and replaced with item T6BCC before pressurizing the radiator. Please also refer to Myson Technical Bulletin – "*T6 IVC Radiator Side Connection Supplement*" for additional instructions regarding the factory installed thermostatic valve and air vent.
- PEX, copper adapters or radiator valves are not included with T6 radiator and must be purchased separately. Please refer to below for possible options and refer to Myson document "*Radiator Component Guide*" for more detail.
- Radiators are not for use in open loop systems, drinking water systems or steam systems.

- Type 21 CV radiators are built with 2 panels and 1 convector bank – with a total thickness of 70 mm (nominal 2-3/4").
- Type 21 RCV radiators are built with 2 panels and 1 convector bank – with a total thickness of 72 mm (nominal 2-7/8").
- Type 22 CV radiators are built with 2 panels and 2 convector banks – with a total thickness of 102 mm (nominal 4").
- Type 22 RCV radiators are built with 2 panels and 2 convector banks – with a total thickness of 104 mm (nominal 4-1/8").
- EZ Wall Brackets are included with all Contractor Series radiators.
- Contractor Series radiators come with factory installed thermostatic valve, manual adjustment knob, air vent and plug.
- Thermostatic valve actuator heads are available and sold separately (*see above for items*).
- Bottom connection ports are plugged with temporary plastic plugs. If these ports are not used for supply and return, the temporary plastic plugs must be removed and replaced with side port plugs.
- PEX, copper adapters or radiator valves are not included with Contractor Series radiators and must be purchased separately. Please refer to the above for possible options and refer to Myson document "*Radiator Component Guide*" for more detail.
- Radiators are not for use in open loop systems, drinking water systems or steam systems.

- Type 11 radiators are built with 1 row of flat bars and 1 convector bank – with a total thickness of 68 mm (nominal 2-11/16").
- Type 22 radiators are built with 2 row of flat bars and 2 convector banks – with a total thickness of 93 mm (nominal 3-11/16").
- Standard wall brackets are included with the purchase based on radiator height, either KOM-300, KOM-400, KOM-500 or KOM-600 (*all KOM brackets a.k.a. "L-brackets"*). 2H units (142mm) use a different bracket type (BBCB+BBWB-O).
- Decor units have 1/2" BSPP connections. Installers can connect direct to these ports when employing 1/2" BSPPF x 3/4" M adapters (item: 102-82-53) in conjunction with either 1/2" PEX adapter (item: 12manifg) or 1/2" copper compression adapter (item: 101-68-44). Similarly, valves are available for connection to Decor radiators. Please refer to separately available "*Myson Radiator Valve Selection Guide*". Adapters, fittings and valves must all be purchased separately.
- Radiators are not for use in open loop systems, drinking water systems or steam systems.
