

## How To: Baldwin Digital Catalogs

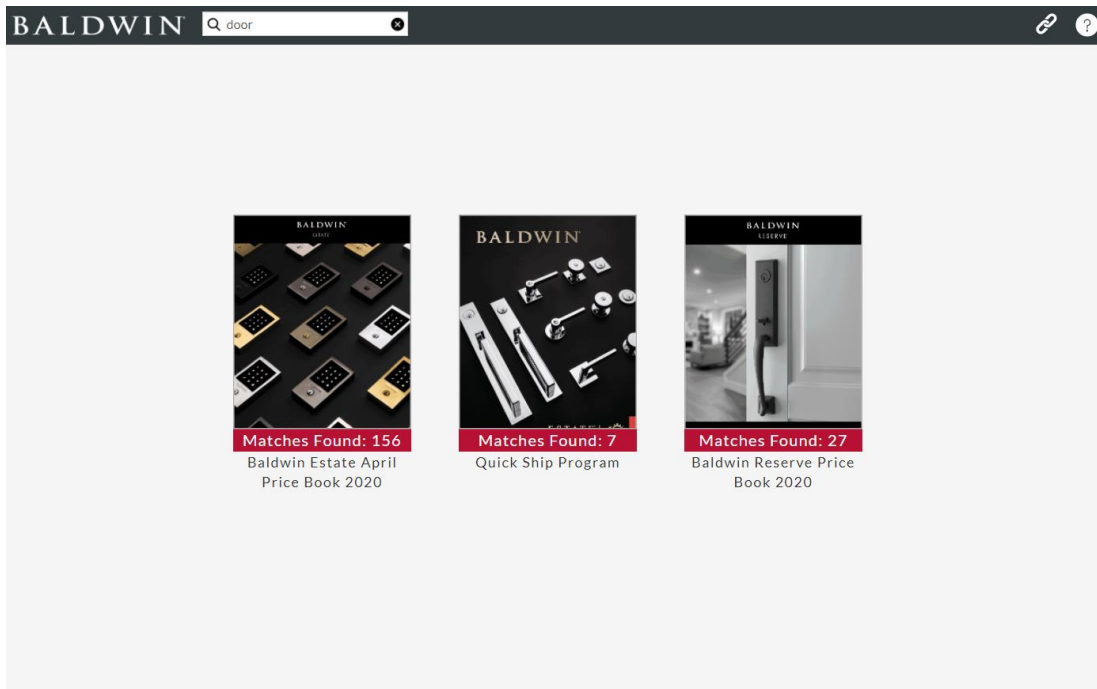

*catalogs.baldwinhardware.com*

The Baldwin digital catalogs library provides users with a virtual replica of print literature, which are displayed in an HTML5-based user interface for use across desktop, tablet and smartphone devices. Users can search, share and discover by interacting with the site.

### Bookshelf

Upon entry into the site, users will see different publications to select. The search bar in the top-left corner allows users to search across all titles before selecting a publication. Clicking on any thumbnail will launch that specific digital publication, with an array of additional features available to the user.

Image 1) Bookshelf with search results after submitting "door" search

\_ Search bar that allows searching across all titles

\_ Copy Link icon that simply copies URL link for pasting

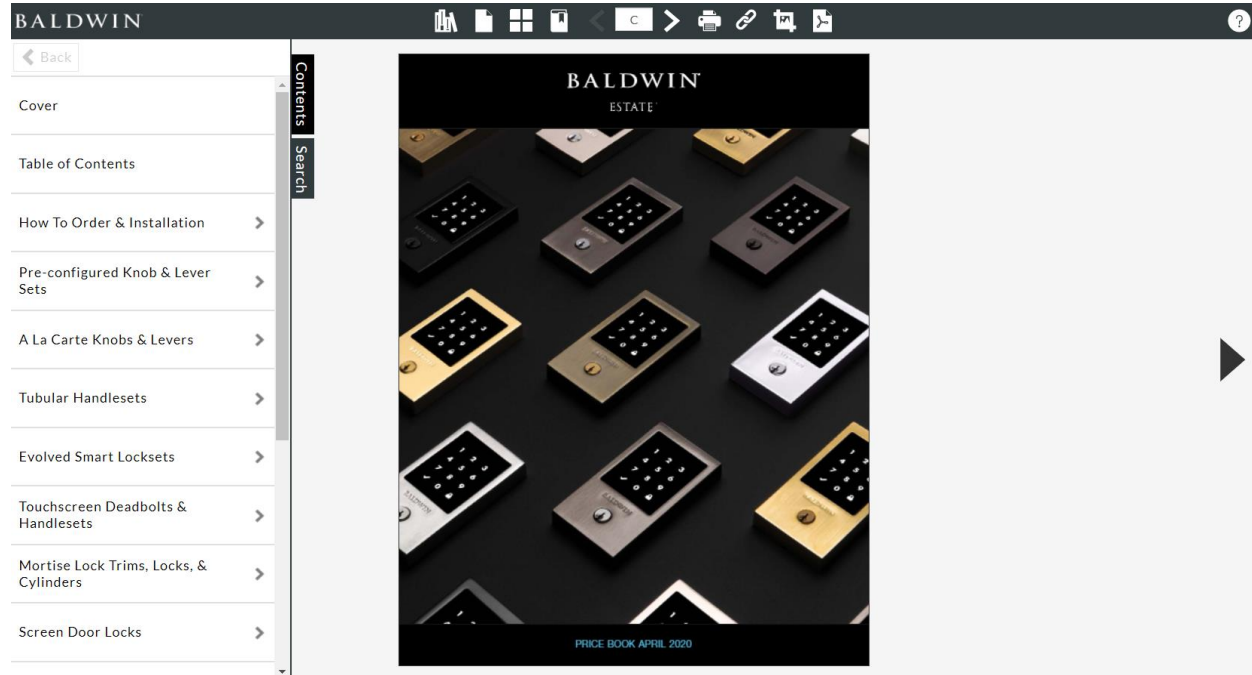

\_ Help icon that loads instructions on navigation and general usage of publications

## Publication

Once a user has selected a publication, the interface will no longer display in the bookshelf format. Here, users can page through an entire publication and engage with a number of toolbar features.

## Toolbar Features

\_ Bookshelf icon that sends user back to bookshelf page with different titles

\_ Single/Facing toggle that allows user to switch between single page and spread pages

\_ Thumbnails icon that provides user with scrollable grid view of all pages in publication

\_ Bookmark icon that gives note-taking feature for bookmarking of favorite pages

\_ Page input and arrows for going direct to page or clicking through one at a time

\_ Print icon that opens instructions for printing a range of pages to local printer

\_ Copy Link icon that copies a page-specific URL link to share direct link to given page

\_ Crop icon that launches drag-and-drop feature for downloading cropped images

\_ Export PDF icon that allows user to download either entire PDF or specific page range

\_ Help icon that loads instructional dialogue for navigating and using digital catalog

## Tabs

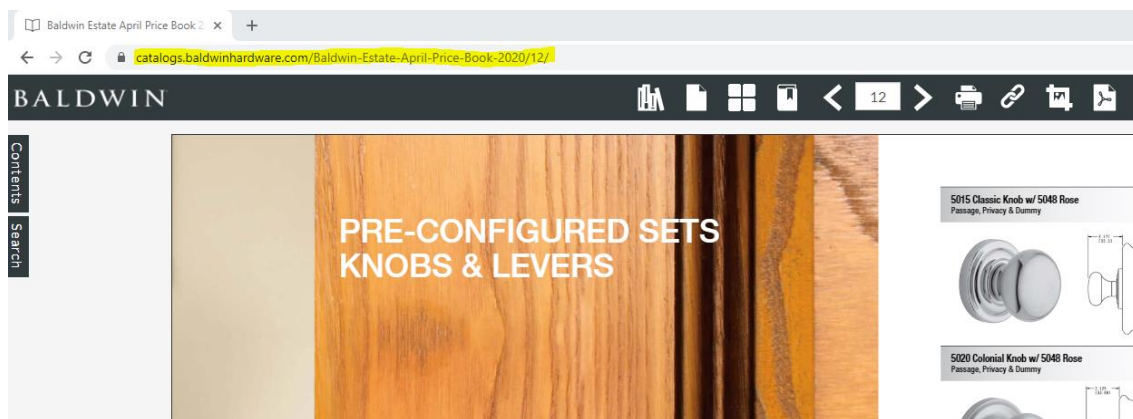

\_ Contents tab that displays interactive table of contents for jumping directly to sections

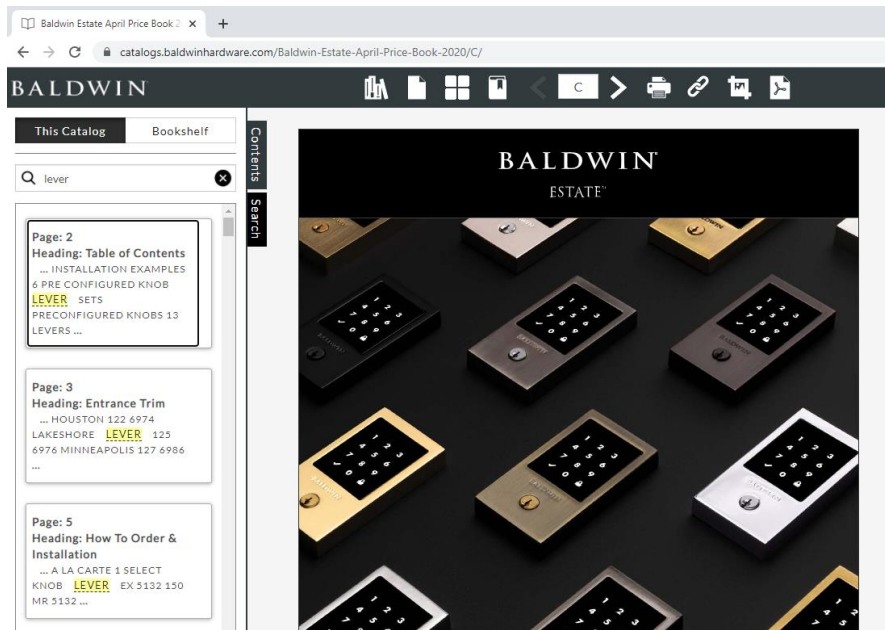

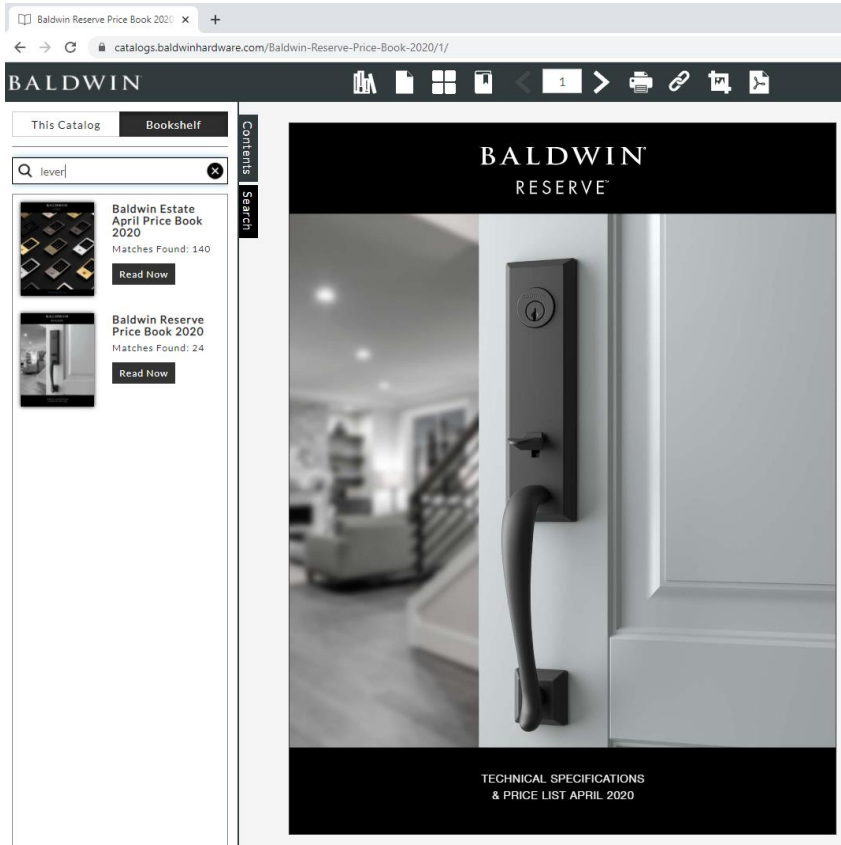

\_ Search tab that allows users to search within individual publication or entire bookshelf

## Helpful Tips

- The URL link is dynamic and updates as a user makes their way through the catalog. This makes sharing simple — just copy and paste the URL in your browser address bar. For example, selecting the Baldwin Estate April Price Book 2020 publication changes the URL to "<https://catalogs.baldwinhardware.com/Baldwin-Estate-April-Price-Book-2020/C/>" — a URL that goes directly to the cover page of this specific publication. As the user navigates this given publication, the page number in the URL will alter and display a link that goes directly to a given page (like the knobs and levers section here — <https://catalogs.baldwinhardware.com/Baldwin-Estate-April-Price-Book-2020/12/>).

- Other publications can be accessed and searched from within an individual publication. Just open the "Search" tab on the left-hand side to see options to search "This Catalog" versus the "Bookshelf." Selecting a publication will load the new publication and populate search results in the tab container.

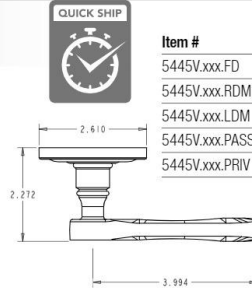

- Zoom in before cropping to receive a larger image. Save a copy of the cropped image to your desktop, because the original cropped image is only a temporary file stored on a unique temporary URL. The image below is cropped from page 14 in the Baldwin Estate Price Book (<https://catalogs.baldwinhardware.com/Baldwin-Estate-April-Price-Book-2020/14/>).

- The PDF download feature pulls files from the original hi-res PDF. This means all PDF downloads — either a full PDF or a range of pages — saves as sharp, clean, original PDFs. Although the digital catalogs are optimized to display with limited loss in quality, the original PDFs will always show the highest quality in sharpness and detail. The PDF export links will eventually expire, so download a copy to your desktop to save the file for future use.
