General notes

With this price list, we are pleased to offer you our optimized range of basins, washstands and washplaces. You can expect a market-oriented portfolio which stands for variety and meets many different requirements of the individual bathroom design.

In these times, the issues of hygiene and sustainability are becoming more and more important. We are strongly committed to this and are now equipping white basins and washstands with the new ProShield surface.

The new Alape ProShield surface: no more chance for bacteria and fungi

Due to the material and the manufacturing process, our surfaces are almost pore-free and have therefore always been very easy to care for and hygienic. ProShield now ensures even more hygiene: the surface of the glazed steel frees itself from bacteria thanks to the addition of silver ions. ProShield is now available as a standard for every white basin and every white washstand. Find out more at www.alape.com/en/proshield/.

Novelties | Current range

From page 5 you will find a list of our novelties, the discontinued articles and the article index of our current portfolio.

Variable installation types for basins

With regards to systematic variety, Alape's extensive range remains unsurpassed. It includes undermount, built-in, semi-recessed basins, sit-on and dish basins. These small, subtle differences allow Alape to set accents in bathroom design. On page 11 you will find information about the benefits of every installation type.

Fittings information

Please refer to the price list in the product descriptions for information on the optimum water impact area on the basin mold.

Colors

Our basins, washbasins and washing plates made of glazed steel are by default in white surface. On page 173 you will find an overview of which series are for surcharge also available in the current glossy and matte colors.

Service team

Our service team provides partner-like and competent support. You can reach the team on +1 (800)-774-1181 or mail.usa@alape.com.

Technical Data

We have collated all important information for you as a planning professional at www.alape.com. Here you can find more extensive information and technical details for each product, such as CAD data, descriptive texts or declarations of performance.

WARNING:

Products listed in this price book can expose you to chemicals including Cobalt (II) Oxid, which is known to the State of California to cause cancer and birth defects or other reproductive harm.

For more information go to www.P65Warnings.ca.gov

Note:

- The basins and washstands are standard equipped with overflow (with some exceptions)

Alape installation overview

With regards to systematic variety, Alape's extensive range remains unsurpassed. It includes undermount, built-in, semi-recessed basins, sit-on and dish basins. These small, subtle differences allow Alape to set accents in bathroom design.

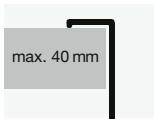

UB Undermount basins

Undermount

Classic undermounting variant. With its integrating character, it creates a harmonious overall impression at the washplace. Material-specific special sets are not required for assembly. It can be installed with all standard counter top materials and thicknesses.

EB Built-in basins

Drop-in

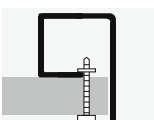

The most traditional and widespread installation solution. Distinctive edge defines the basin above the counter top. Assembly and sealing take place in a straightforward and fast manner using a polystyrene ring located on the basin edge, supplied adhesive, and in some cases additional mechanical bracket elements. It can be installed with all modern counter top materials up to a max. thickness of 40 mm.

Built-in basins with 3 mm edge

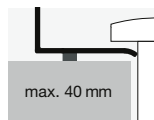

Filigree Alape special solution for basins with 3 mm wall thickness. As standard with the series, basin edge protrudes 25 mm and beyond. Sealing takes place with a sealing material to be chosen by the installer, which should be coordinated with the counter top in terms of color. It can be installed with all mineral-bound, 30 mm-thick counter top materials.

AB / SB Sit-on and dish basins

Traditional sit-on basins

Classic installation variant, lending the basin a dominant character at the washplace. Classic mechanical assembly using the supplied mounting set. It can be installed with all standard counter top materials from 12 to 40 mm thickness.

Sit-on basins with 3 mm edge

Filigree basin variant for the sit-on basin with a mere 3 mm-thick edge. A spacer ring under the basin underscores the filigree shape and simplifies cleaning. Mounting is straightforward thanks to the supplied shaft valve that can be adjusted to the counter thickness. It can be installed with all standard counter top materials from 12 to 40 mm thickness.

Glazed steel:
A material with many advantages.

With “A” form”, we have gone from producing wash jugs, pitchers and bowls over 125 years ago to one of the most diverse ranges of basins and washstands in the industry.

Besides the vast range of variants with regard to design and assembly, our basins and washstands made from glazed steel offer further benefits resulting from the material. In day-to-day use, you benefit from these positive characteristics.

Surface Glazed Steel

In the glaze firing, an almost pore-free surface of glass-smooth quality is created, on which neither microorganisms nor dirt particles can find a hold. In addition, the surface does not become statically charged and does not attract dust. This makes our surfaces very easy to care for and hygienic.

The new Alape ProShield surface : additional protection against bacteria and fungi

The surface of the glazed steel frees itself from bacteria and fungi thanks to the addition of silver ions. It acts like a protective shield. Our white basins and washstands are equipped with the ProShield surface as standard.

Resistant to impacts, scratches and abrasions

The glaze, a wafer-thin skin up to a maximum of 300 µm, is immune to external influences. Thin and robust, the glaze deals with the day-to-day household challenges thanks to its innate resistance. Therefore, it is a rare occurrence for scratch marks, abrasions or flaking to arise.

Colorfast and resistant to UV light

Our basin and washstand colors do not fade, regardless of how intensive your shade of color is. This is due to the specific pigments in the glaze, which do not adopt their final color until the firing process. After this, the glaze is perfectly protected against all types of influences.

Stable shape

Our basins and washstands enjoy a tolerance of +2/-0 millimeters. With intricate manufacturing from the titanium reinforced steel and fired at 830 degrees Celsius, Alape basins always retain their shape and withstand external influences such as varying temperatures and mechanical loads.

Lightness

Traditionally, our basins and washstands have wall thicknesses between 1.5 and 3 millimetres. Therefore, they are significantly lighter than equivalent products made from other materials.

Resistant to heat and cold

The glaze is fired into the steel at 830 degrees Celsius and withstands temperature differences of between -60 and +450 degrees Celsius. Even temperature shocks, in other words sudden effects of heat and cold, cannot harm the material.

Resistant to acids and chemicals

Our glazing has the same acid resistance as glass, meaning that hydrofluoric acid could damage the surface long-term. This is based upon glass-forming oxides, which fuse with the steel during the firing process as a protective coating.

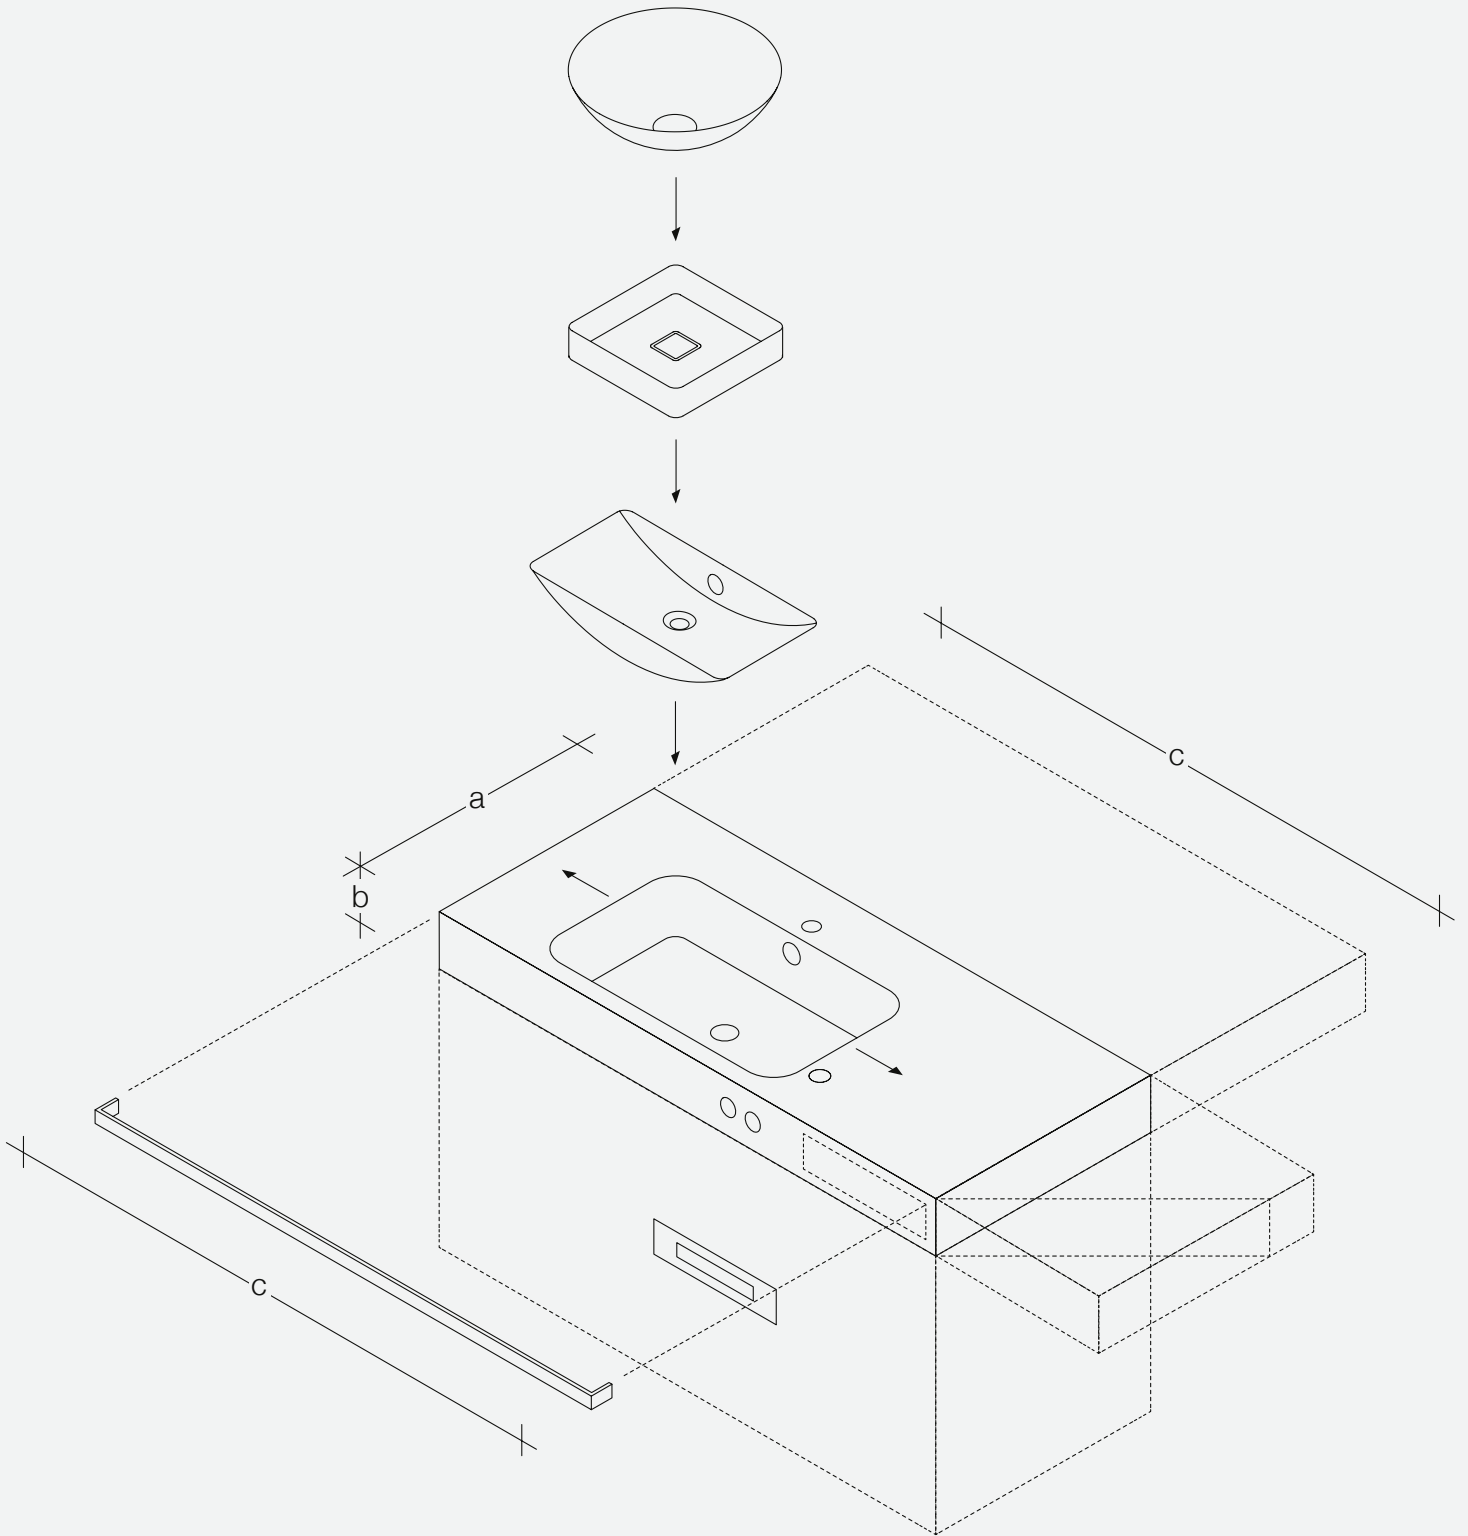

Made-to-measure washplaces

Regardless of the construction task at hand, we can adjust our products to meet a project's requirements above and beyond the series standard in terms of color, dimensions and functionality. Our washstands can practically be freely configured with respect to width, depth and height. Because of their structural design, functional elements such as waste bins, lotion dispensers, tissue holders, and towel bars can be integrated as needed.

We are pleased to undertake made-to-measure manufacturing for niches. We can provide washplaces for tight or complex blueprints or oblique sections and notches in the washstand. Even in the case of custom specifications, our basins and washstands always retain their precision with a dimension tolerance of a mere $+2/-0$ millimeter.

Whether it is an extremely small space, hotel bathroom, semi-public restroom or spa area, our abilities go beyond basins and washstands. We are able to integrate countertops and furniture pieces, whether utilizing a single or multiple sinks in a design.

Individualization in detail

Project-specific solutions for built-in basins

The edge height can be set variably on built-in basins made from 3 mm glazed steel. The standard here is 25 millimetre edge height above the counter top; however, other overhangs can be set with equally exact precision and stress the basin's filigree shape.

Custom-made products

Sit-on basins can be adjusted to meet project-specific requirements in terms of external height and width dimension; this applies to washstands in terms of depth, width and height.

Drill holes

We can provide custom drill holes in basins and washstands in line with a specification. Not only the bore hole's diameter can be varied, but also its position on the washstand or tap area. Additional drill holes can be integrated upon request and adjusted in terms of position and diameter.

Functional integration

The design-related benefits of glazed steel enable additional functions to be integrated on a straightforward basis. For example, tissue dispensers can be integrated into washstands or towel holders assembled onto them.

Notches and oblique sections

In complex room situations, washplaces can be implemented often only with made-to-measure products. Through oblique sections, or making notches in corners, we are able to adjust washstands to the exact millimeter. Therefore, we are able to react quickly to such planning challenges. We can also manufacture fixtures according to your specifications.

**Custom engraving and free colour choice**

Logos or lettering can be engraved to achieve your own custom branding. Our laser engraving, done in the top most layer of glaze, is discreet and long-lasting. We can accommodate custom color requests according to RAL in quantities of ten or more. According to your specification, our production department can create color samples from glazed steel for you to choose from and approve.

Adjusting semi-recessed basins

To guarantee a harmonious overall appearance, semi built-in basins can be coordinated precisely in terms of their inner radius to suit the radius of the counter top material. Furthermore, the front skirt's height can be varied.

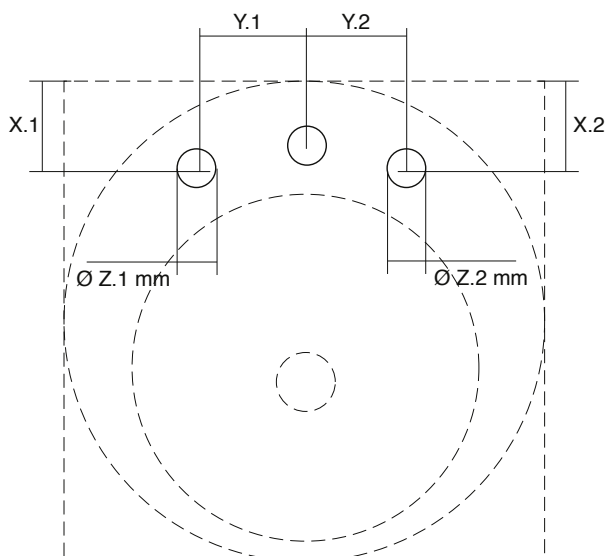

Faucet and drill hole information

Faucets with a vertical outlet and aerator provide the optimum flow of water onto the surface below (angle of impact: 90°). We ensure here that the outlet on the stand or wall faucets aligns with the vent in the basin, and that water does not impact to the left or right of the valve cap in the basin. To minimize splashing we also recommend to use a flow restrictor of maximum 7,5l/min. or to reduce the water pressure to maximum 4,5 bar.

In regard to the mounting height of a wall outlet faucet, please adhere to the respective instructions or recommendations of the manufacturer. The distance between the top edge of the basin and bottom edge of the outlet is normally between 140 to 200 mm.

Please refer to the price list in the product descriptions for information on the optimum water impact area on the basin mould.

The standard dimensions for tap drill holes is 36 mm according to EN 111. The hole spacing is 100 mm.

All special versions, such as tap hole variants of series products as well as three-hole and lotion dispenser drillings are available on request.

Return goods policy

- I. Alape will accept as return goods only products which are defective because of poor workmanship or materials.
- II. Authorization for the return of goods will be determined under the Conditions of Sale and Limited Warranties, as expressed in this pricelist. Please refer to the Warranty section for more information.
- III. Under no circumstances will merchandise be accepted for return without prior express written authorization.
- IV. Customers will submit requests for returns and must provide all of the following information:
 - A. Quantity
 - B. Article number and description
 - C. Purchase order or invoice number
 - D. Reason for return
- V. A copy of the Return Goods Authorization (R.G.A.) form authorizing you to return only the items listed will be send to you. A Return Shipping label will also be send to you. Any product returned that has not been authorized and included on the RGA form will be considered unauthorized and no credit will be issued. Unauthorized items will be returned to you at your expense.
- VI. Preparation of products for return: All products must be individually packed either in their original carton and packing materials, or carefully wrapped and boxed to prevent damage while in transit. Any Alape cartons must be placed in a proper shipping box with adequate packing materials. Please clearly indicate the contents on all internal boxes. Please tape all boxes closed.
- VII. The return shipment should be sent to Dornbracht Americas, freight prepaid, prior to the expiration date of the R.G.A. Any material returned after the expiration date will be refused and will not be accepted for credit at a later date. Please return goods via UPS GROUND SERVICE if possible. If weight or size of package prohibits using UPS, please ship freight collect. Enclose one copy of the R.G.A. form. The R.G.A. authorization number must be clearly written on all exterior boxes returned. Cartons not properly identified will not be accepted.
- VIII. The value of the returned merchandise will be determined following a physical inspection of the materials received. A credit for those items determined defective will then be issued.
- IX. The value of the items returned will be determined as follows:
 - A. Factory defective items or incorrectly shipped items – a full credit will be given upon receipt and inspection, if packaged properly. Credit for incorrectly shipped items will only be provided if the items are returned in the original carton and are in resalable condition.
 - B. Authorized return of resalable material – invoice price minus restocking charge based upon the time elapsed since the invoice date:
 1. Within 120 days of receipt – 25 percent restocking charge
 2. Over 120 days of receipt – merchandise will not be authorized for return
 - C. Unauthorized return – no credit issued.
 - D. Non-current goods – no credit will be issued for items that are returned that are no longer listed in our current catalog and pricelist.
- X. Special order items are not subject to return.
- XI. Proper packaging, labeling and protection of the return goods shipment is the responsibility of the shipper.

Return goods checkinglist

In order to receive credit on any return goods, please use the following check list:

- Have the returned products been carefully wrapped to prevent any damage?
- Are the returned products in the original packaging, or properly boxed and clearly marked with the product number?
- Has the product packaging been placed in a shipping carton with adequate packing materials?
- Is a copy of the R.G.A. form included with the returned products?

Conditions of sale and limited warranties

Over the years, Alape has earned a reputation for excellence in technology, design and quality control. Every effort has gone into making each Alape product perform to its own high standards and to satisfy the Customer. Alape provides the following limited warranties on its products: Alape warrants its products, installed in a residential application, to be free from manufacturing defects in materials and workmanship for a period of five (5) years from the date of purchase by the original consumer owner. This limited warranty is subject to the warranty conditions and limitations as set forth below.

General Finish Limited Warranty: Alape warrants the finish of its products installed in a residential application, to be free from manufacturing defects in materials and workmanship for a period of five (5) years from the date of purchase by the original consumer owner.

Warranty Conditions and Limitations: Alape does not assume liability for labor charges, removal and reinstallation expenses, freight or postage, injuries, or any incidental or consequential damages resulting from a defective product. Alape does not assume any responsibility other than to repair or replace the defective part(s) after Alape, upon its examination, has determined the product to be defective and the defective part(s) are covered by a limited warranty expressed in these Conditions of Sale and Limited Warranties. Whether to repair or replace the product or its finish shall be at the sole election of Alape. All of the limited warranties set forth in these Conditions of Sale and Limited Warranties are in lieu of any other warranties, express or implied.

All Alape warranties are strictly limited to the first residential consumer of its product. Alape Finish warranties are strictly limited to products correctly installed and used in a residential environment. Product problems which result from abuse, misuse, improper installation and/or maintenance, hard water, proximity to bodies of salt water, or accidental damage are not covered by any warranty set forth in these Conditions of Sale and Limited Warranties. Finish problems which result from abuse, misuse, improper installations and/or maintenance, hard water, proximity to bodies of salt water, exposure to direct sunlight or accidental damage are not covered by this warranty. The use of plumber's putty will void this warranty. A non-corrosive Epoxy Silicon sealing compound may be used.

Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

Warranty Claims: Alape warranties are limited to the first residential consumer of its product. These warranties are in effect for Alape products purchased on January 2004 and thereafter. For warranty claims, please contact your Alape dealer, or you may write to:

Dornbracht Americas Inc.
1700 Executive Drive South, Suite 600
Duluth GA 30096.

Please include the original receipt with a description of the problem, model number, store and date of purchase, name of installer, and your name, address and telephone number.

General Information

For Alape, comprehensive support in all planning phases is a matter of course. So if you need information on our product range or have any other questions, the representatives responsible for your region are happy to assist. Furthermore, you can reach our German office on +49(0)5321.558-111. Our service team provides partner-like and competent support. You can also find out more quickly and easily in the Internet.

Under www.alape.com you have the following services at your fingertips:

- Cutout dimensions for built-in, semi-built-in, sit-on and dish basins
- 2D and 3D drawings of all the Basic Components in dxf file format
- Technical data sheets and installation instructions as pdf
- Tender specifications in pdf format
