POWDER COATING

Powder coatings offer a high-quality and durable finish that has quickly become one of the most in-demand, gorgeous design aesthetics in the industry, as well as a critical part of True's environmental and sustainability programs.

GLOSS LEVEL

Gloss level is simply is a measure of how shiny the powder coating finish is on a sample. This is generally measured with a meter on scale 0-100, with 0 being completely flat or matte, and 100 being extremely shiny or glossy.

FINISHES + IN-PERSON SAMPLES

True recommends all finishes be reviewed and approved with in-person samples in comparable lighting to the eventual space where the finish will reside. Sample swatches are available for purchase on our [website](#).

RAL COLOR MATCH

Not all True Residential custom color finishes are an exact RAL match. Those with an asterisk were specially crafted by True and designated an RAL # that is most similar True's unique finish.

A gorgeous, soothing deep blue / gray, True Residential's new Juniper finish is not only lauded for its versatility, but for conjuring images of the Juniper berries, spirits, and Juniper Tree. This calming hue inspires a much needed sense of serenity and relaxation — whether you're cooking for two, twenty, or even sipping a G&T.

Juniper is a deep breath of fresh, aromatic air.
