The Range That Makes Anything Possible

MotionReact

No need to touch the appliance, MotionReact is a sensor that turns on the light when it detects movement at close range. It is especially useful if your hands are full or dirty from prepping food.

Connectivity

Operate your Miele Range from anywhere on your smart phone or tablet with WiFiConn@ct. Explore different settings and programs, while having the ability to network your Miele appliances with the Miele@home app.

Moisture Plus

Adds a burst of steam for extraordinary roasting and baking results ensuring an incredibly light dough and a nicely browned crust.

Wireless Precision Probe

Precise temperature control, with correct-to-the-minute information on how long a program has to run. With a wireless connection, the roast probe is extremely safe to use as you can insert the probe outside of the oven.

Backlit Knobs

Backlit precision knobs allow you to see if the burner has been turned off after cooking. Cooling system and cool-touch front allow maximum protection keeping all surfaces around the Range cool.

M Touch

Innovative M Touch controls allow for easy navigation through an intuitive swipe of the screen. The touch-activated ComfortLift Panel is designed to provide optimum comfort and ease.

Harmonious Design

Redefined professional look aligns harmoniously with Miele products. Available in All Gas, Dual Fuel, Electric and Induction, ranging in widths from 30", 36" and 48", which features a unique 3-door concept.

Burner Performance

The M Pro dual stacked burner system, with TrueSimmer, delivers a maximum of 19,500 BTUs; allowing for absolute control whether simmering or searing your favorite foods. M Pro infrared griddle and M Pro grill options are available.
