CREATING GREATER COMFORT AND ENHANCED HYGIENE

Add-On Bidet Toilet Seats and Electronic Cleansing Toilets

The concept of bidet cleansing has been growing in the U.S., and now more than ever families are focused on hygiene and protecting the planet. Moen's collection of add-on bidet toilet seats includes electronic and non-electronic options, along with electronic cleansing toilets that bring the latest automated technology and controls to bidet cleansing, including distinctive features like a system of endless warm water.

Why do people need these innovations?

As people become more concerned about hygiene and wasteful paper use, Moen is offering a set of bidet cleansing innovations that introduces a multitude of technological improvements and conveniences in a range of price options. Now, families can upgrade their bath experience, add comfort and improve hygiene by either retrofitting a traditional toilet or by replacing it with a tankless cleansing eToilet. Both options provide endless warm water for both front and rear cleansing at the touch of a button, as well as (in select models) warm air drying with temperature control and remote control.

How do they work?

Electronic Add-On Bidet Toilet Seats

Moen's Electronic Add-On Bidet Toilet Seats enable you to replace your current toilet seat with an affordable solution that transforms your hygiene routine and will leave you feeling fresh and clean. They fit most elongated and round toilets and come with Quick Release® Hinges and a Quick Attach design for easy installation. Now, you can enjoy instantaneous heated water for front and rear wash options, water temperature and pressure control, and an antimicrobial heated seat, with adjustable temperature control.

Electronic Cleansing Toilets

Moen's Electronic Cleansing Toilets are fully functioning, tankless eToilets in a sleek profile that eliminates the bulky container from the back of the toilet. These eToilets provide all the functionality of a smart toilet with the added functionality of a bidet. They come with both push-button controls on the toilet as well as remote control, enabling front and rear wash control, dryer control, flush control, and the ability to open and close the lid. They also feature a deodorizing system and hands-free auto-close and auto-flush functions that are activated when you walk away.
