Coffee Care Kits—Part Substitution

The Sub-Zero Group, Inc. just released the information below regarding a part substitution being made to the following Wolf Coffee Care Kits. This change affects the orderable part number and the Milk Carafe cleaning solutions within the kit. Due to a supplier availability issue, the new Coffee Care Kit (830402) is delayed. As a short-term solution, they will use the legacy Coffee Care Kit (824768) as a substitute. This kit has supported the Espresso Coffee systems over the past many years.

The difference between the kits, current and new, is the Milk Clean solution. Both solutions are suitable for either the legacy or next generation coffee systems. The following table shows the contents of each Coffee Care Kit:

Current Item Number	New Item Number	Kit Description/Contents:
824768		Coffee Care Kit: -(2) packs of 2 descaler bottles -Cleaning and maintenance guide -Water hardness text strip -Microfiber cleaning cloth -Cleaning brush -Milk Clean
	830402	New Care Kit: -(2) packs of descaler bottles -Cleaning and maintenance guide -Water hardness test strip -Microfiber cleaning cloth -Cleaning brush -MultiClean

This part substitution will occur automatically. Any open orders for 830402 will ship as 824768. This substitution will occur until the availability issue is resolved. At which point, orders and fulfillment will automatically return to item number 830402.

Please contact your Territory Sales Manager if you have any questions regarding the information provided in this ArrowGram.
