

Dear Noritz Partners:

We are excited to announce our latest product in the Commercial lineup, the Noritz Hybrid Hot.

This Hybrid Hot pairs high efficiency and quality you expect from a Noritz unit with the storage of a standard tank. This powerful combination is engineered to provide an answer to the hot water demand question business owners ask daily.

The best of Tank and Tankless finally meet!

Highlights include:

- **The tankless trademark of supplying continuous hot water**
 - Hybrid Hot leans on the Noritz NCC199CDV to continue providing endless hot water as the storage tank replenishes.
- **Greater 1 hour delivery**
 - The benefit of a pre-installed pump allows the Noritz Hybrid Hot to provide a higher Gallons Per Hour (GPH) delivery rate compared to other systems.
- **Fast Hot Water Recovery**
 - The larger pump enables quicker recovery speed. That allows businesses to stay efficient, save money and improve their energy consumption.

We stay dedicated in our commitment to supplying you with unparalleled products and services.

Respectfully,

Jason Fleming

Noritz America
