## Order a linear drain at no extra cost

### Did you know Americh makes its own linear drain?

Our drain is custom made in-house for Americh products. The drain is wider than the average after-market slot drain used on most baths and is better capable of handling water overflow.

The drain is laminated to the bath and becomes a solid part of the structure of the bath. Our pop-ups are custom made to fit our over-sized drain channel.

Promo does not include linear trim plate. A standard charge of \$140 list will apply.  
Customer must specify linear drain on the P.O.
