

The Wire April 2023

Zurn Wilkins Product Discontinuation

Nearly a quarter century ago we started to phase out the **large 900 series** backflow preventer in favor of the 300 series large backflow. Many valve assemblies have reached the end of their expected lifespan. We will no longer offer specialty machined and assembled parts. **We will continue to offer rubber repair kits and typical wearable items.**

Effective April 28th, 2023, **Zurn Wilkins will discontinue production of specialty 900 series large backflow components.** Zurn's top parts distribution partners will continue to have stock of parts until inventory is depleted.
