

ROHL®

VERONA™ BATH COLLECTION

The Italian city of Verona's buildings span centuries, but it's the work of 16th century architect Michele Sanmicheli that stands out. His compositions fused classical and early Renaissance styles into graceful designs dominated by cylindrical forms like arches, domes, and columns. The Verona™ Bath Collection brings this aesthetic to the fore by combining simplicity with sheer elegance. The graceful arched curve of the faucet and dome-like base of the handles create subtle drama reminiscent of Verona's architecture, to give traditional baths a Renaissance of their own.
