

ROHL®

ACQUI® KITCHEN COLLECTION

Designed by Anthony D'Argenzio of Zio and Sons

The Acqui® Collection is named for the Italian city of Acqui Terme, famous for centuries for its thermal springs and spas. It captures the classical essence of the lavish and ornate architecture of the Grand Spa hotels of the Belle Époque, when spa-travel was the trend. This Collection takes a decorative stance, with its distinctive curved spout and rich detailing. The choice of finishes and cross handles or levers creates combinations to emphasize personal style for a one-of-a-kind look for the kitchen.
