

ROHL®

LUX™ KITCHEN COLLECTION

Style paired down to the essentials, with no unnecessary frills: that's the principle behind the Industrial Chic movement, and the Lux™ Kitchen Collection. Taking elements from 19th century industrial spaces, like the stainless steel kitchens of fishmongers, Lux is pure streamlined simplicity. It follows a natural, clean line from the base that organically curves into the spout. The Collection includes a range of pull-down faucets in a professional-chef design for a hardworking, unfettered look. This is a faucet for those who believe that less is more beautiful.
