

ROHL®

QUARTILE™ KITCHEN COLLECTION

The Quartile™ Collection is inspired by the Cubist architecture of Milan. Quartile honors this modernist style with four-sided, geometric designs for the kitchen. The Collection reimagines the curve of the neck with a squared-off shape that dramatically extends into space, complemented by a parallel rectangular lever. There's a sense of upward motion that comes to life when water flows from the spout. Authentically crafted, the Quartile Collection is a natural fit for modern, industrial and transitional décor.
