

ROHL®

TENERIFE™ KITCHEN COLLECTION

The lush beaches of Tenerife are home to the majestic Canary Island palm, native only to the Islands. This magnificent tree dominates the landscape, with a crown of green leaves that can spread beyond 20 feet. The Tenerife™ Kitchen Collection turns the intricate details of this exotic palm into an eye-catching element. The crosshatch embossing on the handles and base replicates the natural diamond-shape pattern of the tree trunk. The faucet column rises in height, mirroring the stature of the tropical palm, accompanied by the long arc of the neck. Tenerife brings a natural island element into kitchens of transitional and modern style.
