Disclaimer

The mirrors associated with your order may not be certified by Underwriters Laboratories ("UL") as compliant with applicable safety standards and/or regulations in your state. Forte Brands will not be liable for any personal injury, illness, or other effects resulting from the use of these non-UL Certified mirrors. You agree to waive any claims against Forte Brands related to the purchase, use, installation, or shipment of these mirrors. In the event of any legal claims against Forte Brands regarding the sale of these mirrors, you agree to indemnify and hold Forte Brands and its representatives harmless.

Mirror UL Certification

All mirrors are available for purchase. UL certifications are only necessary for illuminated mirrors. If you choose to purchase a non-illuminated mirror, UL certification is not required. Please note, if you opt for non-UL listed illuminated mirrors, it is your responsibility to ensure compliance with local safety standards and regulations. UL-certified mirrors are listed below.

10. CSA Certified Basintops are no longer offered
11. Samples for Crystal basin finishes are available (F7CAMPLV)

Color Disclaimer

Disclaimer: Variations in Painted Glass Color

Please be aware that Cristallo glass exhibits natural variations in color due to multiple factors, including the paint's composition, application technique, and the inherent properties of the glass itself. Additionally, the appearance of color can significantly change based on lighting conditions and reflections.

Key Points

1. **Natural Variations:** Each piece of painted glass may display unique color variations, an inherent characteristic of the medium. This includes differences in hue and intensity.
2. **Lighting Effects:** How light interacts with the glass can alter its perceived color. Natural sunlight, incandescent bulbs, and fluorescent lighting can all produce different effects, making the colors appear warmer or cooler. This is particularly evident in the whites and pastel colors.
3. **Reflection and Refraction:** The surrounding environment can influence the colors seen in the glass. Reflections from nearby surfaces or objects, as well as the glass's own refractive properties, can create dynamic changes in color perception.
4. **Viewing Angle:** The angle from which you view the glass can also impact its appearance. Shifts in perspective may enhance or diminish certain colors or patterns.

By understanding these factors, you can appreciate the unique beauty and variability of Cristallo glass. If you have any questions or concerns about color variations, please contact us at orders@fortebrands.com.
