

October 11, 2024

Dear Valued Gerber® Customers,

As part of our regular review and management to ensure our portfolio reflects the items needed to support the success of your business, we are announcing the discontinuation of select products and parts. Effective January 1, 2025, these SKUs will be available while supplies last and inventory will not be replenished. We are confident that Gerber's assortment of products will continue to provide the solutions you need.

Click below to view and download a list of affected products.

[U.S.](#)
[Canada](#)

Key things to note regarding impacted faucets and tub & shower solutions:

- The full Sirius® collection of faucets and bath accessories will be retired to focus on our more popular contemporary collection, Avian®, and new, complementary bath accessory line, Fairbanks™, which are both recently available in Brushed Bronze
- 2.0 gpm handshower kits will be retired due to North American demand for lower flow, water-conserving fittings
 - Sold individually, 2.0 gpm handshowers will still be available
- All Plymouth® bath accessories will be retired as we excitedly introduced all-new Windley™, Fairbanks, and Gilde™ bath accessory collections and look forward to dedicating further resources to new collections in 2025 and beyond
- Tub & shower trim kits without showerheads are being retired so we can drive efficiencies with our inventory, while still accommodating style or flow rate variations with our showerheads that are available, sold separately
- Opulence® valve-only trim kits for ¾" thermostatic valve and Opulence valve-only trim kits for Treysta® pressure balance valves will be retired, while the complete Opulence collection in the showering category with tub & shower trim kits and shower-only trim kits on the Treysta platform will continue to be offered
- Select parts & accessories based on declining demand on specific components will be retired

Key things to note regarding impacted toilets and sinks:

- Due to decreased demand for Biscuit vitreous china products in the market, compared to White products, we are trimming down the Biscuit offerings of select vitreous china products. These include:
 - Maxwell® bathroom sinks
 - Elite™ toilets
- Due to the continued, increased demand for lower flow toilets, Elite right-hand 1.6 gpf tanks will be retired
 - They can be replaced with same tank in 1.28 gpf
- Non-skirted Wicker Park™ two-piece toilets and Logan Square™ standard height elongated bowls will be retired
 - The Logan Square standard height elongated bowl will be retired as demand continues to migrate to the taller, ErgoHeight™ bowls
